EurekaBio Platforms Solutions Application News Report About Contact

Create the New Pave the Way

Reducing Costs and Increasing Efficiency for Your Cell & Gene Therapy R&D

Platforms

Viral Vector R&D and Industrialization Platforms

With a focus on pioneering research in the C&T industry, EurekaBio strives to address conventional cost and virus vector production challenges.

Solutions

Cell Therapy Manufacturing Solutions

EurekaBio offers comprehensive solutions for the preparation and production of cell therapy products, driving cost reduction and enhancing efficiency within the C&T industry.

Platforms

Interdisciplinary R&D Platforms

By integrating automation and biotechnology, scalable designs and builds automated platforms for biological research and development projects.

Application [Learn More](#)

Lentiviral Vector

The EurekaBio bio-automation system, play a vital role in advancing the EukV™ stable lentiviral vector system, especially during the phase of high-throughput monoclonal screening in the development of EukV™ stable producer cell lines.
